Kalinin, V. I. and Rasanova, T. P.
ON THE THEORY OF A MULTI-SEGMENT MAGNETRON. [1961] 10p. 3 refs.
Order from LC or SLA mi$1.80, ph$1.80 61-10856

Trans. of Zhurnal Tekhnicheskoy Fiziki (USSR) 1952, v. 22, no. 10, p. 1592-1598.

The energy relationships in a multi-segment magnetron were investigated. The multi-segment magnetron was represented by a closed sequence of intervals having alternating fields (slots) and drift spaces. Fundamental kinematic relationships were derived, which are the starting point for the calculation of the energy balance in an electron stream. The electron stream itself is included in such a system of n-slots. As a result of this calculation general formulas were found and applied to the specific cases of two, three, and four slots. Comparison of the calculated values with those obtained by experiment disclosed a satisfactory agreement between the observed and calculated excitation

MAGNETIC AND IONOSPHERIC DISTURBANCES.
Yu. D. Kalinin, Editor. January 1961. 96p. OTS price, $2.25. (NASA TECHNICAL TRANSLATION F-49. Translated from collected articles of sections III and V of the IGY program (Geomagnetism and Earth Currents, Ionosphere), no. 1. Compiled by the Interdepartmental Committee responsible for the IGY program attached to the Presidium of the Academy of Sciences of the USSR, Moscow, 1959.)

Presented are 12 reports by Soviet scientists which were originally read at a symposium on geomagnetic and ionospheric disturbances that was held during the Fifth Assembly of the Special Committee for the International Geophysical Year in July-August 1958 in Moscow. Important data obtained after the assembly have been added to some of the reports.
